

Candy Shot

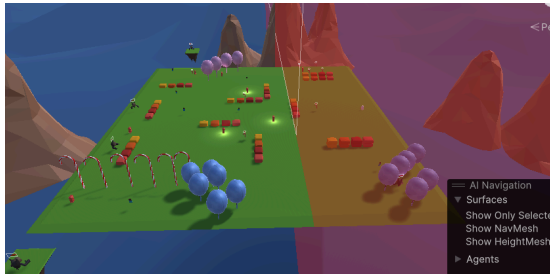

Game Description:

Candy Shot is an FPS, where the goal is to destroy all the enemies on the level. You are equipped with a candy gun that shoots a variety of candy bullets that do different things. You are to use have and go through the level to destroy the enemies in your path. Also, you have a limited amount of bullets so be sure to make every shot count!

Level Design:

The level design is quite simple; it represents a candy filled world with candy type enemies. There are simple obstacles to block the player and enemies are hiding in the scenery.

Enemy and collectables:

There are two enemy types you will face: The Black skull ghost will shoot these peppermint projectiles at you when you are in range. The red candy cane enemies will chase you down to deal damage on contact with you when you are in range. The collectables are ammo and health that are spread around the level that make use of these. Also, be careful these collectibles are one time only so be sure when to get them.
